PROFILE

Senior Engineering Leader with 10+ years scaling teams and defining technology strategy. Direct experience leading engineering for high-traffic platforms like Forbes.com (100M+ users). Proven success executing cloud migrations (GCP), implementing data platforms (Snowflake), launching mobile apps (100k+ downloads), incorporating AI into web applications, and scaling affiliate marketing systems. Expertise in budget management, process optimization, and security leadership (NIST/ISO). Seeking Senior Director / VP opportunities.

EMPLOYMENT HISTORY

Director of Engineering, Platform at Forbes, Jersey City, NJ

September 2021 — Present

Product & Revenue Growth:

- Led engineering for Forbes Vetted (\$54M revenue generation), coordinating with business stakeholders.
- Drove Forbes.com homepage redesign, boosting conversion by 42%.
- Launched Forbes mobile app, achieving 100K+ downloads and enhancing engagement.

Technology & Platform Leadership:

- Manage Forbes.com's proprietary CMS, optimizing content workflows.
- Spearheaded development of proprietary AI & BI solutions.
- Managed migration to Google Cloud Platform (GCP), improving efficiency and cost-effectiveness.

Security & Culture:

- Contributed to implementing NIST-aligned cybersecurity standards.
- Established an engineering publication to drive innovation.

Data Analytics Technology Lead at USAA, Phoenix

May 2018 — September 2021

- Led data initiatives including Snowflake migration and ML program launch, enhancing analytics and data-driven decisions.
- Oversaw mobile/web API development and mobile app relaunch, improving system reliability and user engagement.

Senior Software Engineer at WebPT, Phoenix

September 2016 — April 2018

- ISO 27001 Certification Support:** Led engineering implementation of security controls, contributing to successful ISO 27001 certification and enhanced data protection.

EDUCATION

M.S. Cybersecurity, Grand Canyon University, Phoenix

B.S. Computer Information Systems, Arizona State University, Tempe
